PROFESSIONAL SUMMARY

Data Scientist with 3+ years of experience applying machine learning, statistical analysis, and data engineering techniques to business and public-sector problems. Experienced in Python, SQL, pandas, scikit-learn, and cloud-based analytics. Strong background in predictive modeling, data validation, and communicating analytical findings to non-technical stakeholders.

EDUCATION

- MSc in Data Science — University of Cape Town, South Africa | 2021–2022
- BSc in Statistics — University of Rwanda | 2017–2021

PROFESSIONAL EXPERIENCE

Data Scientist — Insight Analytics Ltd, Kigali | Jan 2023–Present

- Developed customer churn and demand forecasting models using Python and scikit-learn.
- Built SQL data pipelines combining transactional, customer, and operational datasets.
- Improved model performance through feature engineering, cross-validation, and hyperparameter tuning.
- Created analytical dashboards and reports for management using Power BI and Python.
- Translated business questions into measurable data science problems with cross-functional teams.

Data Analyst — Rwanda Market Research Group | Aug 2021–Dec 2022

- Cleaned and validated survey and administrative datasets using Python, SQL, and Excel.
- Performed exploratory and inferential statistical analysis to identify customer and market trends.
- Automated recurring reports and reduced manual data preparation work.
- Presented analytical findings to project managers and external stakeholders.

SELECTED DATA SCIENCE PROJECTS

- Customer Churn Prediction — Built a classification model using customer behavior, transaction history, and service usage; evaluated precision, recall, F1-score, and ROC-AUC.
- Retail Demand Forecasting — Developed time-series forecasting models to estimate weekly product demand and support inventory planning.
- Public Services Analytics — Designed a SQL/Python pipeline for cleaning service-request records and identifying geographic and seasonal patterns.

TECHNICAL SKILLS

Python, SQL, pandas, NumPy, scikit-learn, XGBoost, statistics, machine learning, feature engineering, model evaluation, time-series analysis, Power BI, Git, PostgreSQL, Excel, basic AWS
